

TNO-3050T

QVGA Thermal Camera

Benefits

- The advanced thermal imaging technology provides high contrast to make the unseen details visible without additional lighting
- Choose from seven different types of colour palette to get the best image depending on situation
- Easily detect events that occur at long distances (detection range up to 4,472m)
- Digital Image Stabilization with built-in Gyro sensor allows to correct the effects of vibration caused by environmental factors, such as wind, while also compensating for rolling shutter effects
- Enhanced video & audio analytics improves the overall security system's efficiency by automatically notifying users when abnormal behaviour is detected.
