Quantec Surveyor Data Management Software
Part No. QT707S

Overview

- Allows detailed reports on all aspects of a Quantec system's call activity to be sent direct to a PC's desktop.
- Provides valuable information on call history, busiest shifts, staff response times and more.
- Allows management to take tighter control of their care facilities.
- Ideal for evaluating staff performance, reviewing patient demands and determining labour levels/shift patterns.
- Requires a PC running Windows XP, Vista, 7 or 8.

DID YOU KNOW a new version of our Surveyor data management software (Surveyor2) complete with user configurable dashboards, Key Performance Indicator settings & remote access capabilities is now available? Click here for details.
