

NC917L / NC915L

Call Push / Desk Push

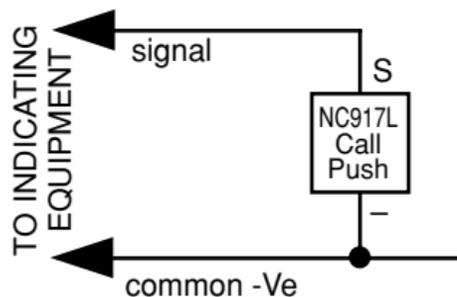

Approved Document No: DUC9170100 Rev 5

- common negative
- RC do not connect
- S latching signal (remains active when call button released)
- NLS non-latching signal (only active when call button pressed)

These instructions are for the NC917L Call Push and the NC915L Desk Push, both of which have latching and non-latching signals. Latching and non-latching signal can be used independently or together
